Leadership Shadow Recap

Casting a positive leadership shadow requires "walking the talk" and demonstrating consistency between the following four domains:

Sometimes the impact that we intend to have is not what is experienced by others, what shows up in business results, or is evident in the culture that we foster around us.

This is partly explained by leadership research demonstrating that when we assess ourselves on certain dimensions, such as our Leadership Shadow, we do not always see ourselves as others do.

Typically:

1/3 of leaders see their Leadership Shadow as others see it

1/3 of leaders view their Leadership Shadow more positively than others

1/3 of leaders view their Leadership Shadow less positively than others

The following Consistency Check activity will assist you to gain alignment between how you and others see your Leadership Shadow.
